<u>Eyes</u> (make 2)

(in black felt) Cut out 2 large ovals
(in white felt) Cut out 2 small circles

Stitch the circles of white circles to the center of each black oval using white thread. Keeping the tail of red yarn at the bottom of the head , position and affix black ovals at front of face. Make sure they are positioned relative to the point on the top rear of the head. When looking at the face straight on, the point should be in the middle relative to the eyes. You can first glue the eyes in place, then when the glue is dry, stitch them around the edge with black thread to secure them. Alternatively, you can stitch them straight on without using the glue. I find the glue helpful so that they stay where I want them to while stitching.

Embellishments

Side panels

From black felt, cut out 2 upside down teardrop shapes and cut a hole large enough for each arm to slip through. Insert arms through the holes with the pointy end facing down. Using black thread, stitch into place. You may need to trim the felt at the top and bottom to fit your Deadpool. The top should extend right up to where the head meets the body. The point at the bottom should extend down the side of the leg. However, it should not touch the black stripe around the calf.

Belt

Using grey felt, cut a strip long enough to wrap all the way around the waist.

Wrap it around with the join at the front. Stitch into place using grey thread.

Belt buckle

Using red felt, cut out a small circle and using black felt, two semi-circles that together are smaller than the red circle.

Position and stitch the black semicircles on the red circle using black thread.. Then position the belt buckle so that it covers the join at the front of the belt and stitch into place using red thread.
